Dear Sir:

I don't agree!

I think the proposed USDOJ "settlement" is little more than a capitulation to Microsoft.

During the original trial, there were hundreds and hundreds of pages of original testimony proving beyond doubt that Microsoft has strong-armed companies--even companies as large as IBM--into doing its will.

The proposed DOJ agreement almost completely ignores this mountain of evidence!

Microsoft also made a deliberate attempt to raising the entry barrier into the operating system industry to achieve a monopolistic position.
